

ASHUTOSH MISHRA

A Resolute Professional

M: 82679 81672

E: ashumishra2013@gmail.com

Delivered the big wins in "Software Development"

Professional Summation

PROFICIENCY FORTE

Languages:

HTML, CSS, Core JAVA, JavaScript, TypeScript

Operating Systems:

Windows, Linux, Mac

Technologies:

React, Node.js, Cloud Computing, Docker

Database Technologies:

MSQL and MongoDB

Application Software:

Kony Visualizer (For Frontend), Kony Fabric (For Backend), Visual Studio, Tortoise Git

Web Servers:

Apache Tomcat 8.5.3

Linux Troubleshooting and Server Hardening

- Skilled, results driven technology professional with over **4+ years of IT experience** encompassing **colossal exposure** in **frond-end and back-end development**. Extensive programming language/database technologies library encompassing **HTML, CSS, JavaScript, Lit web component, React, Node.js, Mongo DB**. Currently spearheading as **Senior Product Engineer** with **Temenos India**
- Expertise in **designing, coding, testing, debugging, documenting software**, and enhancing existing components
- Adeptly conducting design and code reviews to **ensure code developed meets coding best practices guidelines, unit testing, security, and scalability and maintainability guidelines**
- Passion for **crafting engaging user interfaces and seamless web experiences**. **Skilled in responsive design, cross-browser computability and optimizing website performance**
- **A complete manager**, capable of performing a wide range of people management functions from **mentoring, training & monitoring the performance of team**

Proficiency Forte

- Developed and implemented new software solutions to improve efficiency and reduce costs
- Collaborated with other engineers to develop new features and troubleshoot existing systems
- Wrote and tested code for software applications using various programming languages
- Monitored and maintained software systems to ensure optimal performance and security
- Develop and implement new software programs
- Maintain and improve the performance of existing software
- Clearly and regularly communicate with management and technical support colleagues
- Design and update software database
- Test and maintain software products to ensure strong functionality and optimization
- Recommend improvements to existing software programs as necessary
- Analyse and test programs and products before formal launch
- Troubleshoot coding problems quickly and efficiently to ensure a productive workplace

Experience Chronology

Temenos India

Senior Product Engineer

Growth Path:

- Senior Product Engineer – Aug 2022 - till date
- Senior Software Engineer- Aug 2021 – Jul 2022
- Software Engineer – Aug 2020 – July 2021

- Intern – Jan 2020- June 2020

Notables:

- ❖ Bagged **GEM (Go Extra Mile) award** for meeting development timelines and as a team to meet common delivery
- ❖ Bestowed with '**Temenos Star Award**' for fulfilling commitments
- ❖ Committed to provide support at all times
- ❖ Certified in Red Hat System Administrator and specialist in Ansible automation

Highlights as Senior Product Engineer / Senior Software Engineer:

- Accountable for gathering requirements, project planning, software system design, coding, testing, release, deployment, and support
- Honed in creating software deployment strategies that are essential for the successful deployment of software in the work environment
- Proactively communicating with end users and internal customers for debugging and testing of application software for accuracy, integrity, interoperability, and completeness
- Involved in designing, building, and optimizing automation systems that help to execute business web and data infrastructure platforms
- Lead design, development and implementation of complex technical solutions for products
- Actively contributed to project planning, troubleshooting complex issues, and staying up to date with industry best practices and emerging technologies

Highlights as Software Engineer:

- Developed and supported new and existing software including back-end applications, persistent storage queries, and API interfaces
- Nimble in developing algorithms, data and process models, and interfaces that are digitally and cloud-native for use in the construction of solutions of varying complexities
- Deft in identifying issues in the production phase and system and implementing solutions to overcome those issues
- Stellar in designing reviews and code reviews as part of a structured software development life cycle and delivering a well-structured and high-quality code
- Dexterity in developing a structured application/interface code, new program documentation and operations documentation
- Accountable for creating software deployment strategies essential for the successful deployment of software in the work environment

Academia

- ❖ SRM University - Computer Science and Engineering - 2020

Professional Certifications:

- 🔗 RedHat Certified System Administrator
- 🔗 RedHat Certified Specialist in Ansible Automation
- 🔗 IBM Certified IBM Blockchain Foundation for Developers through Coursera
- 🔗 Certificate of Completion for Artificial Intelligence, Machine Learning, Big Data and Cloud Computing from Linux World Informatics Pvt. Ltd
- 🔗 Certificate of Comtech Solutions for Computer core fundamentals and C language
- 🔗 Certificate of Hi-tech Computer Centre for Advance Diploma in Java (ADJ)
- 🔗 Certificate of Participation for Android App Development, Delhi

Personal Dossier

Date of Birth : 21-11-1997
Marital Status : Married
Address : 80 Flat c-10 2nd main road Eswaran layout J.P. Nagar Phase 7 Bengaluru Karnataka

ANNEXURE

Software Engineer -- > Senior Product Engineer

Project: Transact User Agent (T24 TUA)

- ⇒ T24 is the core banking system developed by Temenos. Having knowledge in banking domain and T24 Application.
- ⇒ Temenos Product Manager (TPM) is a centralized enterprise platform that allows business users to tailor and launch unique products within no time and with no code. TPM acts as central repository to manage both financial and non-financial products regardless of the core systems servicing the product
- ⇒ Temenos Enterprise Pricing (TEP) solution is a core agnostic platform that empowers business users to launch products and configure associated pricing rules across financial and non financial services.
- ⇒ Provide leadership and technical direction for multidisciplinary team
- ⇒ Identified web-based user interactions and developed highly responsive user interface components
- ⇒ Translated design and wireframe into high quality code wrote application
- ⇒ Employed a variety of languages such as HTML, CSS, JavaScript, typescript, lit web components and ReactJS to write and create user-friendly web pages.
- ⇒ Creating UTD and writing Test cases for the Client Raised Defects and for Enhancements.
- ⇒ Developed new libraries with JAVA, Micro Services architecture using Rest APIs, spring boot and pivotal cloud foundry. Creating a REST API with Java Spring Boot
- ⇒ Worked in agile framework, collaborating with business and research teams in story grooming, reviewing story/acceptance criteria and performance metrics

Software Engineer -

Project: Payments User Agent and Settlement Officer handling the backend and frontend using visualizer and fabric

T24 is the core banking system developed by Temenos. Having knowledge in banking domain and T24 Application.
